

## Translation in the biomedical domain

### Translation by Design workshop

Brussels  
24 April 2023

Anton Ussi  
Operations & Finance Director

1

**Understand the disease mechanisms**

2

**Understand the patient journey**

3

**Develop chemistry to hit the pathology**

4

**Ensure and monitor safety of patients at all stages**

# It takes a village... to make a medicine

---

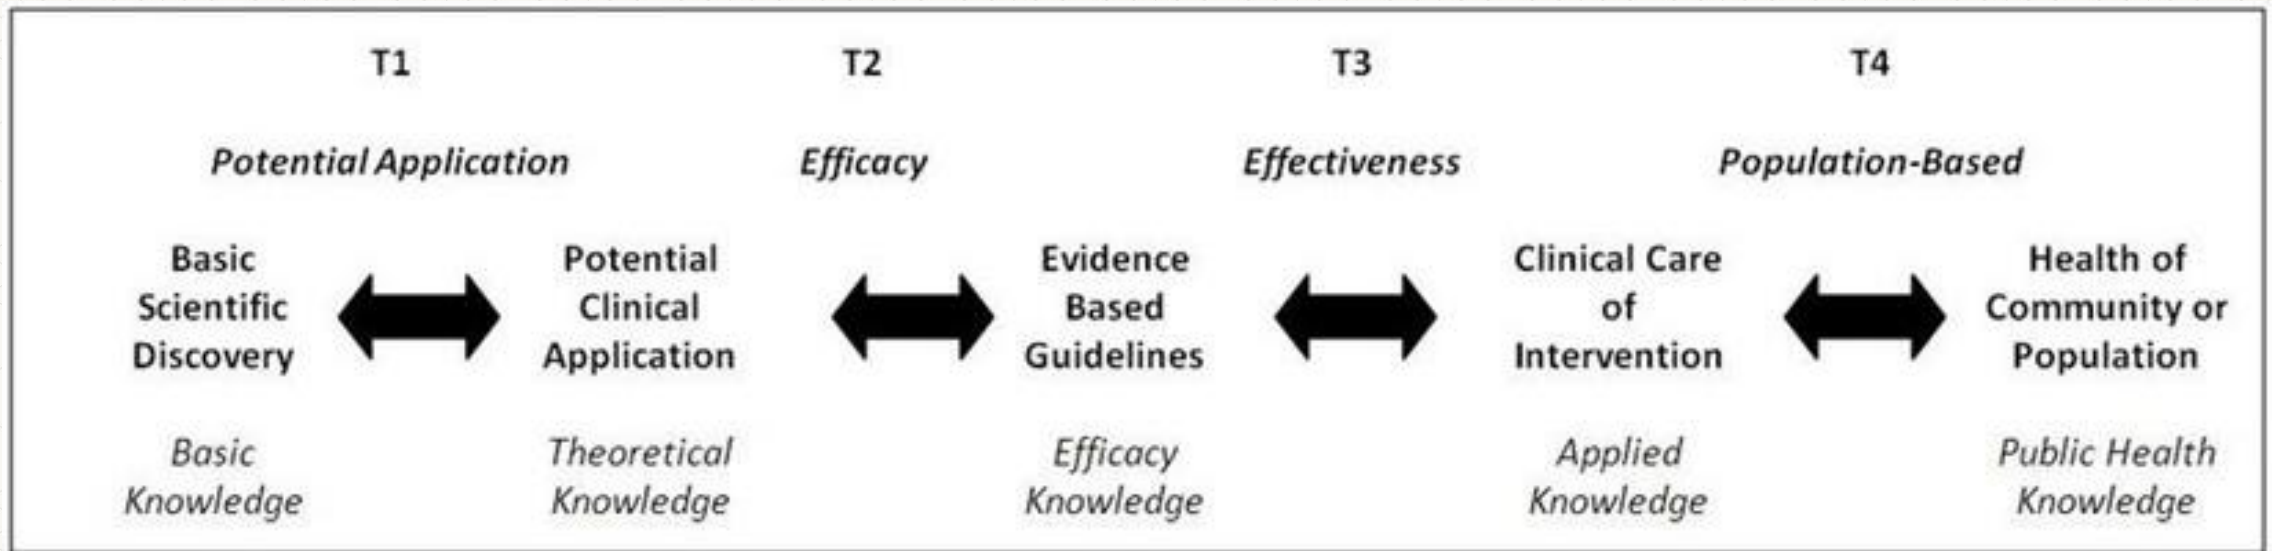

## EATRIS Mission

To accelerate the translation of research discoveries into patient benefit

We serve academia, industry, patients and policy makers

---

# **What is the essence of translation?**

**(and why are we not so good at it?)**

# The essence of translation

Translation is goal-oriented

Identify the goal, plan backwards from there

# The essence of translation

Translation is confirmatory research

But is often funded and executed as  
exploratory science

# The essence of translation

Translation is team science

You'll collaborate outside your institution,  
domain & sector

# The essence of translation

Translation is a long journey from knowledge  
to impact

It's a relay race with many hand-offs, not a  
single sprint

# The essence of translation

Translation requires multi-disciplinarity

You don't know what you don't know about  
the rest of the journey
